## **RELEASE**

(ASX: CUE; NZX: CUE; POMSOX: CUE; ADR/OTC: CUEYY)

### **Manaia-2/2A Progress Report # 10**

Cue Energy Resources Ltd (Cue) advises that the Manaia-2/2A well reached total depth of 2891m MDRT on 4 November 2013. At 0600 hours local time on 8 November 2013 the operator was conducting an open hole wireline logging operation. Since the previous report, an 8 ½" hole was drilled through the Mangahewa Formation, the underlying Farewell Formation and terminated in the North Cape Formation as planned.

Elevated gas readings and oil fluorescence were observed in the Mangahewa Formation. The significance of these hydrocarbon shows will be evaluated by the current logging programme.

Manaia-2/2A is located in PMP 38160 in the offshore Taranaki Basin, New Zealand. The well is operated by OMV New Zealand Ltd and is being drilled from the semi-submersible drilling rig 'Kan Tan IV'. The well is located 1.25 km north of Maui-4 (which discovered the Manaia Field) and 6 km to the southwest of the Maari Field well head platform (map attached).

Cue will provide weekly progress reports during the drilling of Manaia-2/2A.

Participating interests in PMP 38160 are as follows:

Cue Taranaki Pty Ltd	5%
Horizon Oil International Ltd <i>(a subsidiary of Horizon Oil Ltd)</i>	10%
Todd Maari Ltd	16%
OMV New Zealand Ltd	69% ( <i>Operator</i> )

Any queries regarding the announcement should be directed to the Company on (03) 9670 8668 or email [mail@cuenrg.com.au](mailto:mail@cuenrg.com.au).

A handwritten signature in black ink, appearing to read "David Biggs".

David A.J. Biggs  
Chief Executive Officer
